Espedro Neptune

AI Engineer · UX Engineer · Product Designer

USA, FL | 754-946-0528 | espedroneptune@gmail.com | linkedin.com/in/espedroneptune | **espedroneptune.com**

SUMMARY

AI Engineer, UX Engineer and Product Designer who takes products from user research to production code. Shipped 8 live products end to end, 3 with AI in production: knowledge-grounded assistants that cite their sources, an AI CRM that hands off to a person when judgment is needed, and a self-hosted agent connected to Gmail, Calendar and Docs through MCP that asks before any write action. Builds with React, Next.js, Supabase and the Claude and OpenAI APIs, for users in English, French and Haitian Creole.

SKILLS

AI Engineering	Claude & OpenAI APIs, prompt and system design, MCP integrations, LiteLLM, OpenRouter, self-hosted agents (OpenClaw), Python, RAG (document retrieval), vector databases, agents with tool calling and guardrails, multi-agent workflows, FastAPI, REST APIs, n8n, WebSockets, async queues, data pipelines and telemetry, Docker, testing, LLM app security (OWASP)
Engineering	JavaScript, React, Next.js, Node.js, Express, Vite, Tailwind CSS, Supabase (PostgreSQL, Auth, RLS, Edge Functions, pg_cron), REST APIs, Stripe, WordPress, Linux VPS / SSH
Product & UX	User research, usability testing, information architecture, prototyping, design systems & tokens, WCAG accessibility, multilingual UX, Figma, Adobe CC

SELECTED AI & PRODUCT WORK

Case studies at espedroneptune.com

Dessalines — Self-hosted AI agent — OpenClaw · LiteLLM · MCP · Telegram

- Deployed a personal AI agent on a Linux VPS, connected through MCP to Gmail, Google Calendar and Docs, and reachable from Telegram.
- Designed human-in-the-loop guardrails: the agent asks for confirmation before any write action.

Kominote Konbit — Community platform with AI assistant — React · Supabase · Lovable

- Built "Konbitèz Odette," a Claude assistant with retrieval: before each answer the app selects the matching Konbit document, and Odette cites its source or refers the member to an admin. Guided onboarding on the BelieverHub architecture.

AI BOS CRM — AI-assisted CRM — LLM · Human handoff

- Built a CRM with an AI layer in production that hands the conversation off to a person whenever judgment is needed.

FootLakay — World Cup 2026 prediction platform — React · Tailwind · Supabase · API-Sports

- Shipped a four-language platform with live fixtures, automated scoring (Edge Functions, pg_cron), a social Fan Zone, sponsor management and an AI chatbot persona.

VotPam — Civic information & opinion polls — Figma design system · Web app

- Designed candidate profiles, a news feed and poll results on a dedicated design system built for the platform.

BelieverHub — Faith-based community platform with AI assistant — User research → Production

- Took the product from user research to production, including an AI Bible assistant built with Claude tool calling to a Bible API: it answers Bible questions only and always gives the reference. Its architecture became the foundation for Kominote Konbit.

Also shipped: Agrodoc · Maket Lakay

EXPERIENCE

UX/UI Designer, TransPerfect — Remote · Mar 2025 – Present

- Deliver user research, wireframes, prototypes and visual design for international clients across industries, aligned to client goals and timelines.

UX/UI Engineer, Bloxide — Oct 2024 – Mar 2025

- Designed in Figma and built responsive React interfaces; implemented a design system that kept UI and behavior consistent across devices.

UX/UI Designer, CoinKids — Apr 2023 – Apr 2024

- Increased user retention by finding pain points through research and personas and iterating on direct feedback; applied accessibility best practices for a broader audience.

UX/UI Designer, Freelance — Aug 2021 – Nov 2022

- Raised overall user satisfaction 15% through interactive prototypes and UI refinement across multiple client projects.
- Introduced Figma libraries and design tokens that streamlined workflows with cross-functional teams.

Senior Graphic & Web Designer, Media Innovation — Mar 2012 – Mar 2021

- Designed and maintained client WordPress sites from wireframe to launch, and built brand identities with marketing teams over nine years.
